

All students will make an art journal on the first day to personalize and use weekly throughout the session. Emphasis on using their imagination is key. Lessons will include drawing fundamentals: basic drawing of shapes, shading, building up to 3 dimensional images. Drawing traditional and abstract scenes with animals, landscapes/ environment, imaginary ideas/concepts. Lessons on all basic mediums (pencil, charcoal, crayon, pastels, oil pastels, watercolor), along with primary, secondary color blending, light and shadow... My goal in teaching art to children is to plant a seed early in their development to have an outlet of expression that may otherwise be wordless or difficult to express, as well as introduce a place where they can use their imagination in ways that can build self-esteem, confidence and find a sense of freedom to explore their inner and outer world.
